Crossroads Technologies - *DevOps Analyst/Application Developer*

October 2018 - Current

- Implement and maintain server infrastructure such as SMTP/IMAP server, self hosted development and production environments, and deploy processes
- Aide in the creative/technical workflow by advising about potential implementation/development lifecycles of proposed application features
- Contribute to active development of the application stack (Angular6/Typescript, Django/Python). Implement full-stack features following agile/scrum methodology

Hall Labs - *Web Developer*

January - October 2018

- Aspen Data
  - Worked on a fully dynamic web front end in Typescript/React that can be defined at runtime entirely by a JSON object, including GraphQL mutations/queries, that is defined by machine-learning back-end
  - Developed other full-stack internal apps as needed using web technologies such as Node.js and PostgreSQL. Presented said apps to managers and clients
- Replenish
  - Using AWS Lambda/EC2 and Serverless framework, consumed and processed QR codes extracted from video streams to develop automatic warehouse/inventory management system

DevMountain - *Mentor*

June 2017 - January 2018

- Aided students in learning ES6, React.js, Node.js/Express and SQL
- Debugged full stack web applications built by students

EDUCATION

DevMountain - *Web Development Bootcamp*

February 2017 - May 2017
